Junior Developer Analyst passionate about development and analysis of IT solutions. Skilled in Nextjs, Nodejs, MongoDB, I am known for my ability to learn quickly and work effectively in a team. My goal is to contribute to innovative projects while developing my technical and analytical skills.

Experience

Internship at MIC Belgium (Meet Innovate Create)

During this internship, the goal was to improve the ERP system of the company Oxygenius by using artificial intelligence as-a-service (Microsoft Cognitive Services). Specifically, the aim was to retrieve, filter, and classify attachments into different categories based on the type of email.

ALDI Entrepôt Gembloux

Retrieve store orders, stack them correctly on pallets, and ensure the warehouse remains well-organized.

UBER DRIVER

As a bike courier for Uber Eats, I was responsible for picking up orders from restaurants, delivering them quickly and safely to customers, and using the Uber app to manage tasks and routes. I ensured my equipment was well-maintained and organized effectively to guarantee timely and high-quality deliveries.

Brasserie Exotique Knokke

I was responsible for bringing dishes to the customers' tables, washing the dishes in the kitchen, and occasionally replacing the head chef to prepare certain dishes.
